SKILLS

Languages Python, Java, C/C++, SQL

Frontend React, TypeScript, Tailwind CSS

Backend Node.js / Express, Django REST, Spring Boot

Tools Git & GitHub, Linux,

EDUCATION

Dayananda Sagar Academy of Technology & Management

B.E. Computer Science
2024 – 2028

Deeksha CFL PU College

Class XII (Pre-University)
2022 – 2024

ONLINE DEGREE

IIT – MADRAS BS in DATA SCIENCE AND APPLICATION

2024 – 2028

LANGUAGES

English Intermediate

Hindi Intermediate

Urdu Native

Telugu Beginner

Kannada Beginner

SUMMARY

A hands-on developer who loves turning ideas into real, working products. I care about owning a problem end to end – understanding it, building the solution, and shipping something people can actually use, not just another prototype. Curious and self-directed by nature, always learning whatever the next project demands.

PROJECTS

MetroFlow — Live Bus Transit & Occupancy Dashboard

React · Spring Boot · Socket.IO · Leaflet

- Live transit dashboard for Bangalore's BMTC bus network, with bus movement visualized on an interactive Leaflet map.
- Surfaces each bus's occupancy (whether it's full), location, and estimated arrival time – so riders can see crowding before a bus arrives.
- Admin analytics dashboard giving operators a view of occupancy and movement across routes.

Suraksha — Civic Safety & Crime-Reporting Platform

Django REST · React · Leaflet · JWT

- Five-tier LLM fallback chain (Llama 3.3 70B → Gemini → offline) for resilient complaint triage that never hard-fails.
- Haversine geospatial hotspot clustering with JWT auth, RBAC, rate limiting, and anonymous reporting.
- Real-time incident status tracking with a Chart.js analytics dashboard.
